

Patient Label Reprint within PowerChart, FirstNet, & SurgiNet

Complete the following steps to reprint patient armband, additional patient zebra patient labels, and patient face sheet from PowerChart, FirstNet, or SurgiNet.

1. Write down the **FIN** for the encounter that is requiring a patient label reprint.
2. Click the **Documents** button in your toolbar.

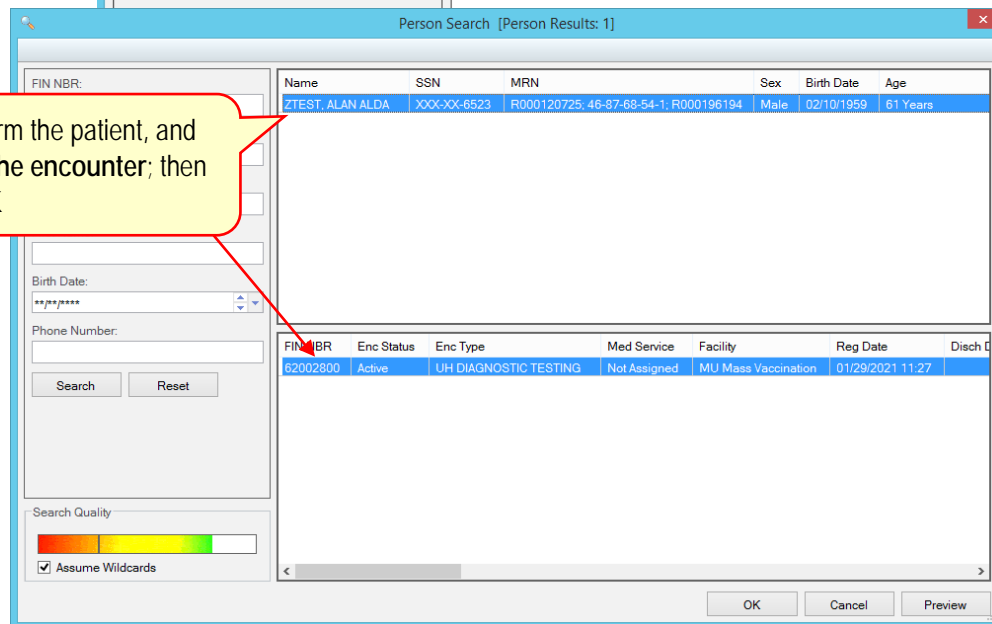

4. Type the **FIN** in the **FIN NBR** search field

A screenshot of a search form. The 'FIN NBR:' field is highlighted with a red box. Below it are fields for 'MRN:', 'Last Name:', 'First Name:', 'Birth Date:', and 'Phone Number:'. At the bottom are 'Search' and 'Reset' buttons.

5. Click **Search**

6. Confirm the patient, and select the encounter; then click **OK**

A screenshot of the 'Person Search [Person Results: 1]' window. It displays a table of search results for patient ZTEST, ALAN ALDA. The table has columns for Name, SSN, MRN, Sex, Birth Date, and Age. Below the patient information, there is a table of encounters.

Name	SSN	MRN	Sex	Birth Date	Age
ZTEST, ALAN ALDA	XXX-XX-6523	R000120725; 46-87-68-54-1; R000196194	Male	02/10/1959	61 Years

FIN NBR	Enc Status	Enc Type	Med Service	Facility	Reg Date	Disch D
62002800	Active	UH DIAGNOSTIC TESTING	Not Assigned	MU Mass Vaccination	01/29/2021 11:27	

At the bottom of the window are 'OK', 'Cancel', and 'Preview' buttons. A 'Search Quality' color scale and a checked 'Assume Wildcards' checkbox are also visible.
