

## **Cathflo® Activase® (alteplase) Preparation and Dosing**

- Reconstitute Cathflo immediately before use
- Cathflo is available for reconstitution in a single-use 2-mg vial
- Wear gloves when mixing alteplase

To reconstitute Cathflo to a final concentration of 2 mg/2 mL:

1. Aseptically WITHDRAW 2.2 mL of **Sterile Water for Injection**, USP (diluent is not provided). Do not use Bacteriostatic Water for Injection, USP
2. INJECT the 2.2 mL of Sterile Water for Injection, USP, into the Cathflo vial, directing the diluent stream into the powder. Slight foaming is normal; let the vial stand undisturbed to allow large bubbles to dissipate
3. Mix by gently SWIRLING until the contents completely dissolve. Complete dissolution should occur within 3 minutes. DO NOT SHAKE. The reconstituted preparation results in a colorless to pale yellow transparent solution
